

GridBeyond™

GridBeyond Academy

Your educational resource library for demand side response, energy technology and the wider energy market.

GridBeyond are proud members of the Continued Professional Development (CPD) Certification Service.

What is the GridBeyond Academy?

GridBeyond believes that education leads to better, more informed business decisions.

We recognise that energy systems are rapidly changing, which is why our academy simplifies complex energy topics to ensure clarity and accessibility for all. The GridBeyond Academy is intrinsically linked to our core values, to empower industries and large energy users to take control of their energy consumption and provide instrumental services to the balancing of the electricity network.

The GridBeyond Academy is an educational library with resources ranging from whitepapers, guides and insight blogs, through to live and recorded webinars, seminars and podcasts, as well as reports, briefings and statements on current energy market affairs. Resource levels vary from introductory/beginner, through to intermediate and advanced, for every level of understanding.

The GridBeyond Academy trains professionals to understand energy consumption, new technologies,

the changing energy landscape, assets for demand side response participation, energy cost saving opportunities, flexibility opportunities and innovative ways of reaching sustainability goals.

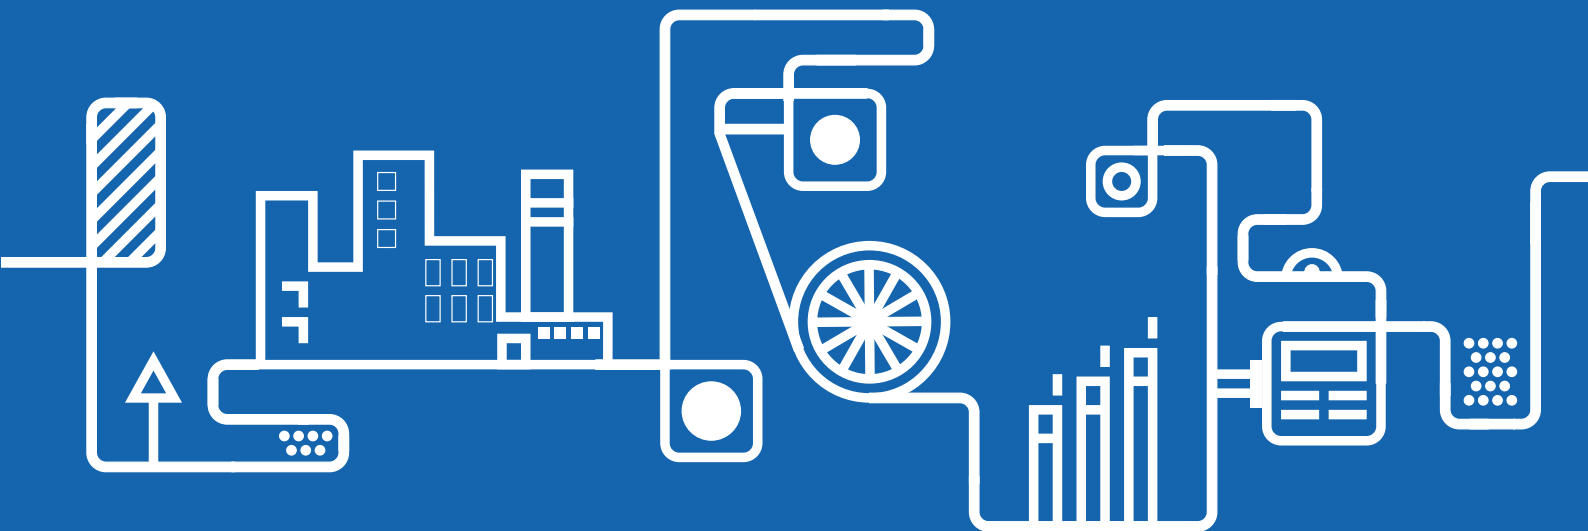

We ensure that the resources are useful across a number of roles, from energy managers to operations and finance professionals, MDs to engineers, and those simply interested in enhancing their business profitability.

CPD Accredited

Many of our resources are CPD accredited, which assures high quality educational content and provides attendees and readers with accredited CPD hours and certificates for their portfolio.

"GridBeyond believes that education leads to better, more informed business decisions."

Created, developed & presented by experienced energy experts

Our resources are of a high quality standard thanks to the expertise of the authors, presenters and contributors. Just a few of our regular contributors include...

Michael Phelan
CEO & Co-Founder

Michael is a DSR pioneer and is in high demand across the UK, Ireland and mainland Europe to speak about GridBeyond's advances in energy and DSR tech. When Michael founded the business back in 2007, the market was a very different place. Michael has led the direction and evolution of the business from wireless sensors and metering, to the intelligent technology and expertise led demand side response business you see today. With Michael at the helm, GridBeyond has continuously anticipated the market, putting clients ahead of the game and optimising their energy for the best available return on their participation.

Wayne Muncaster
Managing Director UK

Wayne has over 20 years' experience in the energy sector. Since starting with British Gas in the 90's, Wayne has seen the energy landscape change significantly and is ideally placed to provide advice and education on this complex market. With the influx of renewable energy and with National Grid requiring the help of technologically advanced aggregators and large energy consumers to ensure the UK can reach it's green goals, Wayne's invaluable knowledge and expertise have secured him a spot as one of the industry's authoritative voices on the topic.

Pdraig Curran
CTO & Co-Founder

Pdraig is the technological brain behind GridBeyond's intelligent energy platform. His experience in wireless sensing and control technology combined with his development of many smart-grid energy optimisation solutions is outstanding in the market. GridBeyond's dynamic sub-millisecond responses, machine learning technologies and complex algorithms are the result of Pdraig and his team's tireless commitment to evolving the unique technology platform.

Eamonn Bell
Head of Market Strategy

Eamonn is the Head of Market Strategy at GridBeyond. His background in energy markets, policies and regulations spans nine years. With qualifications in physics and environmental technology, and having worked for aggregators and trade bodies, Eamonn is arguably one of the best placed individuals to explain the intricacies of the market, and to simplify and clarify this complex part of the energy industry.

Breaking down barriers

The GridBeyond Academy tackles the uncertainty some industries have around demand side response head-on through education. We have discovered that most frustrations and confusion in these areas derive from a lack of information, or conversely through an overload of conflicting information.

As proud members of a number of industry federations, we keep up to date on the energy issues that matter. The knowledge we gain from speaking with members, attending events and taking part in seminars has enabled us to develop webinars and resources for those working both within and outside of these industries.

Start learning today

Access our exclusive resources by visiting the academy section of our website.

Learn about energy consumption, new technologies, the changing energy landscape, assets for demand side response participation, energy cost saving opportunities, flexibility opportunities and innovative ways of reaching sustainability goals. Access:

-  Whitepapers & Guides
-  Webinars & Seminars (recorded & live)
-  Podcasts & Soundbites
-  Insight blogs
-  Briefings, Reports & Statements
