FROM THE PUBLISHERS OF PAPER TECHNOLOGY

Volume 5, Number 1, 2019

PAPERmaking

Installations

The following pages contain a summary of the various installations and orders from around the world of papermaking, wood panel and saw mills, and bio-power generation, received between November 2018 and the end of April 2019. Also included are new announcements about plans to build new mills or install new machinery (in which case the supplier will be noted as 'TBA').

The Paper Industry Technical Association (PITA) is an independent organisation which operates for the general benefit of its members - both individual and corporate - dedicated to promoting and improving the technical and scientific knowledge of those working in the UK pulp and paper industry. Formed in 1960, it serves the Industry, both manufacturers and suppliers, by providing a forum for members to meet and network; it organises visits, conferences and training seminars that cover all aspects of papermaking science. It also publishes the prestigious journal Paper Technology International and the PITA Annual Review, both sent free to members, and a range of other technical publications which include conference proceedings and the acclaimed Essential Guide to Aqueous Coating.
